

FAST LANE SOLUTION

for SAP GROW Fast

Go Live in 16 Weeks, Not 16 Months.

Modern ERP Should Not Mean Months of Disruption

For mid-market companies in Professional Services and Manufacturing, implementing SAP has historically meant long timelines, unpredictable costs, and significant business disruption. Traditional projects stretch 6-10 months, carry high customisation risk, and demand extensive internal resources, all before a single user goes live.

6-10 Months

Typical ERP project
timeline

57%

Of ERP projects
exceed budget

3x Longer

Than originally
planned timelines

FULCRUM Fast Lane Solution for SAP GROW Fast

SAP GROW Fast with SAP Cloud ERP, packaged and delivered by FULCRUM Consulting with a fixed scope, fixed price, and a proven Fit-to-Standard methodology. An accelerated ERP implementation built for mid-market companies who want the power of SAP, without the traditional complexity, cost overruns, and timeline risk.

Who Is It For

Professional Services

Service-driven organisations seeking streamlined ERP and project control.

Manufacturing

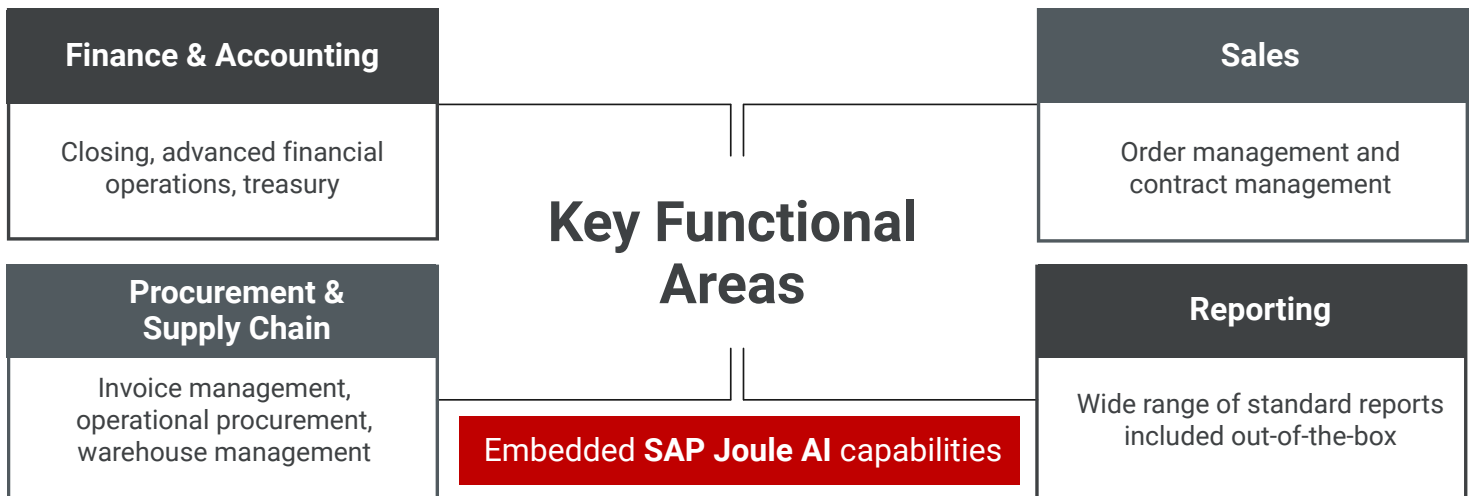

Companies requiring production order management and supply chain efficiency

Fast Lane vs. Standard ERP - at a glance

	Standard ERP Approach	FULCRUM Fast Lane Solution for SAP GROW Fast
Time to Value	6 - 10 months	< 16 weeks
Cost	High, variable	40 - 60% savings
Complexity	Lengthy fit/gap workshops	Pre-configured best practices
Risk	High scope creep risk	Fixed scope, predictable delivery

Everything You Need to Go Live - Nothing You Don't

The package contains all the necessary components to implement the key standard processes. This includes not only finance and accounting, sales with order and contract management, and procurement with invoice management, operational procurement and warehouse management, but also AI-based components such as SAP Joule and a wide range of reports - all included in the standard system.
